## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-10 are allowed.

With respect to claim 1, the following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor makes obvious the combination set forth in the independent claims, and especially does not show *"a flow path extending between a downstream portion of the manifold and an upstream portion of the array the flow path being locally bounded by first surface portions of the manifold and array and where the first surface portions have a first relative radial alignment when the array is rotating at a first speed and a second radial alignment, closer than the first radial alignment, when the array is rotating at a second speed, greater than the first speed"*, in combination with the other claim limitations.

With respect to claim 6, the following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor makes obvious the combination set forth in the independent claims, and especially does not show *"means for directing the charge to the conduits in the at least one charge receiving position and comprising: a first portion; a second portion, downstream of the first portion and positioned to rotate with the conduits during said rotation, at least one of the first and second portions including means for controlling leakage of the charge through one or more gaps between the first and second portions via a venturi effect"*, in combination with the other claim limitations.

With respect to claim 8, the following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor makes obvious the combination set forth in the independent claims, and especially does not show *"a nonrotating manifold portion having:*

Art Unit: 3746

*at least a first sector conveying air to an aligned transient first group of the combustion conduits; and at least a second sector blocking upstream ends of an aligned transient second group of the combustion conduits from upstream communication, first surface portions of the array and manifold providing a venturi effect at a junction between the array and manifold to limit leakage of the charge through the junction", in combination with the other claim limitations.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
